European Beating Cancer Plan

Cancer Registry Networks on national level and europe-wide – Driver for Better Cancer Care?

LUNCH-SYMPOSIUM

20TH GERMAN CONGRESS FOR HEALTH SERVICES RESEARCH

VIRTUAL EVENT

08. Oktober 2021

12.00 – 13.15 UHR

Mit freundlicher Unterstützung der
Roche Pharma AG

European Beating Cancer Plan

Cancer Registry Networks on national level and europe-wide – Driver for Better Cancer Care?

The European Beating Cancer Plan (EBCP) was published in early 2021. The Flagship Initiatives defined in the plan pursue ambitious goals: to significantly improve all aspects of cancer, from prevention to quality of life for survivors, by 2030.

Reliable data, for example from national cancer registries, are a conditio sine qua non for the control and outcome monitoring of big public health initiatives.

Clinical cancer registries record the entire course and treatment of cancer in a standardized form with the long-term goal of significantly improving the prevention, early detection, treatment and follow-up of patients at both the population and individual level.

Most EU Member States have already introduced national cancer registries, but their data collection and quality are still very heterogeneous.

No interoperability standards for linking additional data sources are defined, nor the application of AI on the data sets is currently possible. Thus, the research potential on this huge data sets is far from being exploited adequately.

In order to achieve a harmonized European solution, EU initiatives such as the European Network of Cancer Registries (ENCR) have been advocating for transnational standards for some time.

- How and where do the national and especially the German cancer registries fit into this project?
- What role does the law on the consolidation of cancer registry data in Germany play in this and what do patients and physicians gain from it?
- How can Germany contribute to the development of European cancer registries?

We would like to discuss this exciting topic with the invited experts in our DKVF congress round and cordially invite you to participate with your own questions in the chat.

Referenten und Referentinnen

Dr. Ciaran Nicholl

EU Commission,
Joint Research Center,
Head of Unit Health
in Society

**Prof. Dr. med.
Monika Klinkhammer-Schalke**

Director of the Institute for Quality Assurance and Health Services Research at the University of Regensburg, Chairwoman of the German Network for Health Services Research (DNVF) and the Working Group of German Tumor Centers (ADT)

PD Dr. med. Sylke Zeißig

Medical Director
Cancer Registry
Rheinland-Pfalz
gGmbH

Eva Schumacher-Wulff

Patient representative
and editor-in-chief
of Mamma Mia!
the breast cancer
magazine

Prof. Stefan Benz

Medical Director, Clinic
for General, Visceral,
Thoracic and Pediatric
Surgery Böblingen

Prof. Alexander Katalinic

Cancer Registry-SWH,
Director of the Institute of Social Medicine
and Epidemiology
UKSH, Lübeck

Lisa Braun (Moderation)

Journalist and Managing Director of the
Press Agency Health,
Berlin

Programm

08. OKTOBER 2021 • 12.00– 13.15 UHR

Lisa Braun	**Welcome and introduction of the speakers Keynote**
Prof. Klinkhammer-Schalke	**Keynote speaker** Linking Germany and Europe in health services research
Dr. Ciaran Nicholl	**European Networks of Cancer Registries** Character of the association of European Cancer Registries, plans for further development
Prof. Sylke Zeißig	**Operational view on Germany** Further development, handling of research projects within the national CRs
Prof. Alexander Katalinic	**EU Perspective: European Cancer Plan and Flagships in the context of cancer data / registries** What does the EU expect in the context of EBCP from national projects like CR merging?
Prof. Stefan Benz	**User perspectives clinic - oncologist** As a practitioner and researcher, what do you expect from a national or EU CR?
Eva Schumacher-Wulf	**User perspectives patients** As a patient, what are your hopes from a national and EU CR?
Lisa Braun	**Panel discussion and Q&A** What are the next steps to ensure oncology care research on EU level with a German lead contribution?
